

Intern / working student (f/m)

- available at short-notice -

Best Blades GmbH works on the aerodynamic optimization of rotor blades for wind turbines of all kinds. We provide complete solutions to our customers to increase their annual energy production with high quality technology engineered in Germany.

Your tasks:

We have developed a well-established technology for the aerodynamic optimization of rotor blades for wind turbines.

Your task will be to work on the continuous improvement of this technology and transfer the development and design to new rotor blades.

To this end, parameters, production methods and the necessary prerequisites for a certification according to IEC standards have to be considered and identified.

Our development engineers will support you. The main work location is Hamburg.

Qualification:

- Bachelor degree aerospace engineering, aerodynamics, wind energy, lightweight composite structures or a comparable field of study
- Knowledge in the field of aerodynamics and/or composites is required
- First experience with Catia V5, CFD-software or composite design would be advantageous
- Knowledge in the field of aircraft construction or wind turbine technology is desirable
- Creativity and organizational thinking
- Team spirit and a high degree of self-initiative

Have we piqued your interest? We are looking forward to receive your application by E-mail (a pdf document max. 4 MB) to Ms. Isabel Guzic: i.guzic@best-blades.de.
